Discussion

In the case of references 1-3 above, a "cone" is defined explicitly as a solid formed by the rotation of a straight line. In the case of the fourth reference, a cone is defined as a pyramid with a circular cross section. The fourth source then defines a pyramid as a "polyhedron", which is defined using triangles. Since triangles have straight sides and not curved sides, and since a cone is formed from a triangle, Appellant submits that the fourth reference, like references 1-3 above, define a cone to be formed from rotating a straight line and not formed from rotating curved lines.

That no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge contained in the information disclosure statement was known to any individual designated in § 1.56(e) more than three months prior to the filing of the information disclosure statement.

Pursuant to 37 C.F.R. §1.97(c), appellants submit herewith a check drawn to the order of the Commissioner of Patents & Trademarks in the amounts specified in 37 C.F.R. §1.17(p) of \$180.00. Should the check become lost, should other fee be incurred, the Commissioner is authorized to charge Deposit Account No. 02-4943 of appellant's undersigned attorney in the amount of such fees.

Respectfully submitted,

Robert E. Bushnell
Attorney for Appellant
